

# END UNFAIR PROPERTY TAX

**NORTH DAKOTA vs SOUTH DAKOTA SPENDING**

# END UNFAIR PROPERTY TAX

**NORTH DAKOTA vs SOUTH DAKOTA SPENDING**

## OUR KEY POINTS

- North Dakota has a tremendous amount of sustainable revenue. The problem is that instead of providing REAL tax relief, our elected officials are spending like drunken sailors.
- Provides \$1 billion in TAX RELIEF to the citizens of North Dakota every year.
- You will keep what you are now paying in property taxes, year after year, to spend as you see fit.
- The state legislature replaces what we pay in property tax in 2025 to every city, county, school district, and township with no strings attached.
- No services will be lost, because No revenue will be lost by cities or counties.
- Cities & Counties will retain FULL control of their budgets without any state interference.
- Cities and counties are kept whole through 2025 amounts with property tax replacement, and will be in charge of raising the revenue they need for their needs beyond the replacement amount.
- Provides substantial TAX REFORM by prohibiting taxing property based on valuations.
  - No more trying to understand why your value went up.
  - No more trying to understand mil levies.
  - Future tax increases will be more transparent and have more public input.

The opposition's concerns are addressed by implementing language (new laws introduced in Jan 2025) required for the measure, but they pretend this is not already the plan in place.
